

ODUNAYO DAUDA

PROFESSIONAL SUMMARY

Software developer specializing in React, Next.js and .NET development. Experienced in building modern web applications using TypeScript, Tailwind CSS, and ASP.NET Core 6+, with a track record of delivering responsive user interfaces. Strong background in database design using SQL Server and API development. Committed to writing clean, maintainable code and delivering high-quality user experiences.

WORK HISTORY

Software Developer, 02/2023 to Current
United Bank for Africa - Lagos

- **Performance Management Solution:** Architected and implemented the frontend of a performance management portal using React, improving staff appraisal workflow efficiency by creating an intuitive user interface.
- **Self-Service Portal:** Developed a responsive self-service portal using React, featuring real-time updates and modern UI components, resulting in improved user satisfaction and reduced support tickets.
- **Insurance Claims Portal:** Built a comprehensive insurance claims interface using React and Tailwind CSS, implementing complex form validations and state management.

Frontend Developer, 10/2019 to 01/2023
Momas Consulting - Lagos

- **Food Delivery Platform:** Built responsive UI components with React and Tailwind CSS, featuring an interactive admin dashboard for real-time order tracking. Integrated WebSocket for live updates and implemented secure payment flows, improving overall user engagement and transaction success.
- **Task Management System:** Developed a modern React interface with Bootstrap styling and real-time collaboration features using WebSocket. Created a library of reusable components that streamlined development and maintained consistent UI patterns across the application.
- **E-commerce Website:** Designed a responsive product catalog with Next.js, featuring Redux-powered shopping cart management and efficient filtering systems. Implemented a streamlined PayStack checkout process that reduced cart abandonment and improved conversion rates.

EDUCATION

Bachelor of Science, Chemistry, 02/2015 to 02/2020
Obafemi Awolowo University - Ile-Ife, Osun State

TRAININGS

Infosys Technical Core Finacle Training – Bengaluru, India

Trained on finacle core banking solutions, gaining expertise in banking software architecture, implementation, and optimization.

Advanced Full-Stack Development – Specialized training in .NET, C#, Next.js, React, TypeScript, Node.js, Tailwind CSS, and Docker, focusing on building scalable web applications with modern frameworks and backend technologies.

ALX Software Engineering – Proficient in Git, C, Python, and React, emphasizing collaborative coding.
